

# GLOBAL GENIUS TRUST

Innovation - Value - Ethics

## An Introduction:

*GGT is 'BIG PICTURE' organization that seeks to transform the planet in a positive and eco-responsible way. This document is a concise overview of who we are, and what we wish to accomplish. Please visit our website for more details:*  
[www.ggtrust.com](http://www.ggtrust.com)

## WELCOME TO GLOBAL GENIUS TRUST

**Who are we?** – GGT is a holding company of innovative companies, using cutting-edge technologies to make a difference in the world, and for our investors. We have gone to great lengths to create a group of the best minds in the world to manage your money, to increase your investment, and to benefit society, the environment, economy and spirituality of the world.

**How we are different?** – Whereas most corporations are created to amorally create as much money for the investors as possible, GGT seeks the highest good for all: the investors, the economy, and the world. By leaving the old, dysfunctional corporate pyramid structure and adopting a system of open management and networking, we are open to input from each member of our organization to optimize our collective intelligence and awareness, thus reducing the possibility of blindly pursuing any deleterious path, as has become standard operating procedure for most corporations and governments.

**Why GGT is a Solution for the World?** – GGT not only creates revolutionary projects that benefit the world, by using our innovative organization and collective intelligence decision-making processes, but we set an example for other corporations and governments to follow.

GLOBAL

GENIUS TRUST

## AN INTRODUCTION

Albert Einstein, a recognized genius, once said that it is impossible to solve a problem from the same level of consciousness that created it. The world has managed to create a plethora of assorted problems which are NOT being handled with the current level of consciousness. It is time to try something new. For this reason, we have gathered a group of 'world geniuses', some of the smartest, most intelligent, most savvy people in the world; true pioneering inventors and innovators. We have sought out individuals who have, through their own activities and accomplishments, demonstrated not only intelligence, but increased awareness at many levels; each one has proven him/her self in one or more fields.

Our trustees and advisors are not just academic whizzes, but people who are able to apply their knowledge and intelligence in new and innovative ways, practical ways, to solve the world's problems. Furthermore, these individuals are willing, able, and committed to raise their consciousness to a higher level, to thus see the world's problems from a higher viewpoint, a viewpoint that incorporates the head and the heart, the mind and the spirit, thus enabling us to see the causes and to formulate solutions to these dilemmas.

This is the reason we have had the audacity to name our group Global Genius Trust. Global Genius, because that is who we are, gathered from all over the world. Trust, because that is what we provide to you, an organization of individuals and companies who are worthy of your trust, who will honor the trust that you place in us, to benefit the world, the environment, society, and you, our investors. As you place your money in trust in us, you will also know that it is in the hands of individuals who consider themselves among the caretakers of planet earth; folks who will do no harm, people who seek ways to bring peace instead of war, people who will always put the interest of our planet first before the corporation's interests, yet know quite well how to create abundance and wealth for you. We invite you to browse through all the listings of board of Trustees and Advisory Council; you will notice experts in a wide variety of fields. We work as an extended team; no pyramid decision making here, where it is the boss's way or no way. Our system seeks the *collective intelligence* of those who truly are in a position to heal our world.

Our ultimate goal is *to cause a paradigm shift in the way corporations and governments do business*. We intend to demonstrate a new corporate management model, one that truly uses a wide group of collective intelligence; a model that is based in group consensus decision making process; a group that always exercises social responsibility in all its decisions and processes; a team that makes itself accessible by its investors and customers; a group that has no secrets or hidden agendas. A group that is worth of your trust, and who consider the Earth and its people as our particular trust.

*"To support the transformation and healing of this planet"*

*"The highest good  
for all, and a generous  
return on investment."*

## GENIUS TRUST

### OUR VISION

We create multiple streams of income to support the transformation and healing of this planet. We intend that our leadership in these projects be *heart centered* and *mind supported*. Our work is therefore balanced between the intuition and the intellect, innovation and responsibility, the male and female, the needs and desires of the participants, and the welfare of the Earth.

We seek the solutions and business strategies that provide the highest good to all: the earth, the economy, society and our investors.

### OUR MISSION STATEMENT

We invest our assets in order to first, provide the highest good for all, and second, provide a generous return on investment. We actively seek to recognize new and innovative solutions for problems, and facilitate the implementation of the best of these solutions. We operate from a system of Open Management, allowing the best ideas to be adopted for action.

We provide a creative bridge between the nonstop exploitation of natural resources and the need to protect our delicate environment, while earning high profit for the GGT shareholders.

We accomplish this by proper advance planning, by the use of new alternative technologies and by constant consideration and direct investment in the protection of forest and endangered species. We work to create the societal and legislative framework in which new technologies and sustainable life styles prosper.

We provide initial high-yield investment returns through innovative financial processes, mid-term high returns through gold mining, and long term returns through energy sales, transportation services, and innovative technologies in pharmaceuticals and alternative energy.

We maintain and develop our leading edge capabilities by attracting global genius minds, individuals that excel in their fields, who are very open-minded to research and implement non-conventional technologies.

*“Collective Intelligence  
—a new paradigm in  
management and  
decision-making.”*

## GENIUS TRUST

### OPEN MANAGEMENT

Traditionally, management has been a top-down, hierarchical, pyramid organization. This is true for almost all corporations, the military, government, etc.

We seek to use a new paradigm of management, one in which a network of interconnections, much like those between cells in an organism, replace the top-down organization structure. (See Evolution of Biology and Management, below, for a survey of how organizations and organisms have developed in parallel, and the characteristic of the next level of development of a business.)

#### Collective Intelligence Decision Making System

One of the tools for Open Management will be a collective intelligence decision making software to assist with intelligent decision making. This program will allow the collective intelligence of experts the world over to participate in various decisions. The vote of each participant will be weighted according to the expertise of the voter and the interest of the voter. For example, an expert in road construction may have greater influence over the design of a road, than a plumber, or over a decision to build a road versus start a business, but someone who lives in the neighborhood served by the road may have more weight than that of some other person (non-expert) who lives in an unaffected area.

It is important to balance the influence of the head (intellect) and that of the heart (intuition, feeling) in this decision making. Thus, the opinions of certain representative shamans, priests, and women will be sought to balance the usual male-dominated decision process. And the entire software package is subject to modification, based on consensus and expert opinion.

#### Pound for Pound, the Most Innovative Company in America

GGT seeks to follow the model created by *W. L. Gore & Associates*. In an article in *Fast Company* magazine, the billion dollar company that makes water-shedding hiking boots, heart patches, fire fighting equipment and space hardware is lauded for their innovation. “Pound for pound, the most innovative company in America is W.L. Gore & Associates.” —*Alan Deutschman, Fast Company, 2004.*

*"Our Model: fostering ongoing, consistent, breakthrough creativity."*

## GENIUS TRUST

Deutschman says, "Gore is a strikingly contradictory company: a place where nerds can be mavericks; a place that's impatient with the standard way of working, but more than patient with nurturing ideas and giving them time to flourish; a place that's humble in its origins, yet ravenous for breakthrough ideas and, ultimately, growth. Gore's uniqueness comes from being as innovative in its operating principles as it is in its diverse product lines. This is a company that has kicked over the rules that most other organizations live by... And in its quietly revolutionary way, it is doing something almost magical: fostering ongoing, consistent, breakthrough creativity.

*Malcolm Gladwell*, in *'The Tipping Point'*, points out a few of the characteristics of this innovative company: The company is privately owned, mostly by its workers or "Associates". By the way, few of the employees at Gore have any title other than "Associate". No one has an office better than any other. Gore limits its buildings to 150 workers, as this is the limit for control and communication that has been realized by many different groups, including most military organizations. Working with the same 150 people allows for cooperation, knowing the other members of the organization, and obviates the need for a boss! Indeed, in a group of this size, peer pressure is more effective than is a boss. Instead of a boss, new hires are given a Sponsor or Mentor.

And by sharing in a network of employees, new ideas that come from those implementing the tasks can filter to those who are designing the operations, without running into egos and corporate artificialities. At the same time, the designs and intentions of the creative personnel can be readily understood and implemented at the production level.

### **Network Management in GGT**

As a Trust, GGT will be supervised by a small group of trustees. These trustees will be advised by a large and diverse Board of Advisers, chosen out of the world experts in many different fields. Decisions of the Trustees will also be influenced by representatives of the worker teams, Letters of Wishes submitted by the beneficiaries, and the Collective Intelligence Decision Making software package. Subordinate to GGT are a network of companies, each of which are made up of teams of workers, each team less than 150 workers in size. Each team member will be encouraged to spend 10% or more of his time in new product development. Each team selects one or more representatives to participate in a management council. This management council participates with a team of experts and advisors, and with a manager, to direct the distribution of funds and attention within the company. Representatives of each company management council will participate with the Board of Advisers in advising the Trustees of GGT.

## GENIUS TRUST

### Financial Structure

GGT is created as a *Massachusetts Trust* or *Common Law Trust*. GGT will be owned by its employees (associates), who will receive stocks as part of their compensation package, and by its beneficiaries and stockholders. Shares of stocks are fully transferable, and stockholders are the beneficiaries or *cestui que trust*. Beneficiaries will not have voting shares of stock, but as beneficiaries, they may submit *Letters of Wishes* to the trustees, who will thoughtfully consider all suggestions.

GGT will own, or have partial ownership of, several subordinate companies. These subordinate companies may have various types of business structures: corporation, partnership, LLC, etc. In general, in these companies we will prefer to copy the management style of W. L. Gore and Associates, as described above.

### Evolution of Biology and Management\*

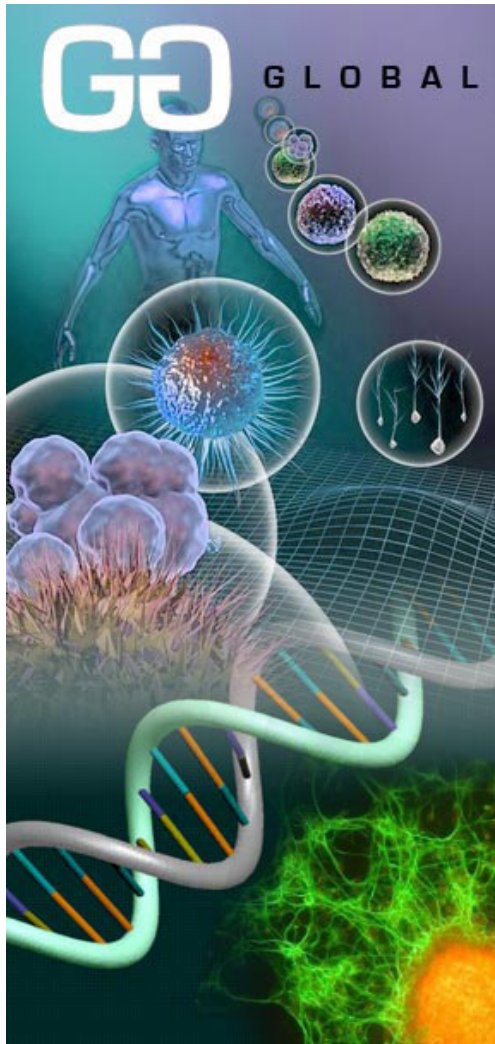

Just as higher organisms have benefited from the development of a more complex nervous system, so too may the evolving organizations benefit from modern communication methodologies. GGT seeks to foster the development of Open Management by creating a novel collective intelligence decision-making software system, which will weigh opinions on a voters personal interest and expertise in field, then seek consensus from the voters. Being nurturing, like a mammal, successful businesses of the Enlightened Age will find or create new “daughter” businesses, and raising them up to be successful organizations, further benefiting workers, investors, customers, and the environment. New businesses will not only nurture their offspring, but they will nurture their environment, diligently seeking the least damaging means of interacting with the environment, and having a pro-active plan for environmental remuneration, reforestation, water reclamation, and waste management.

In order to achieve this order of “mammalian organization,” a business must utilize a balance of the energies of heart and head. It must not only be intelligent, it must be intuitive. Whereas most corporations today are male-dominated, active, aggressive, rigid, and goal oriented, the successful business of the Enlightened Age must be balanced by feminine principles, yin along with the yang; intuitive, as well as intelligent; feeling, as well as doing; flexible, as well as strong; aware of the process, as well as the goal. Most importantly, as the mammalian path has culminated in self-awareness in humans, so must the ideal business become self-aware, cognizant and caring about the full consequences of all of its actions. ([more on our website](#))

*\*Bruce Lipton, PhD., The Biology of Belief*

*“the successful business of the Enlightened Age must be balanced by feminine principles...”*

*"We are committed to new cutting-edge healing modalities, in a holistic perspective of balance."*

## GENIUS TRUST

### BIOMEDICAL

**Mission:** We create innovative laboratories and treatment centers internationally, providing innovative health solutions and increasing knowledge.

GGT Biotech includes *StemTech Labs*, which is building stem cell laboratories for human use on several continents, and conducting research and clinical trials into the best ways to use naturally occurring, non-genetically modified stem cells for optimizing human health.

GGT Biotech also conducts research into ancient alchemical processes which can be used to increase human health, consciousness, and spirituality. While we currently produce small amounts of alchemical products, full scale production laboratories for producing some of these products are planned.

Healing centers utilizing standard medical care, as well as cutting-edge alternative technologies, such as chelation therapy, bio-oxidative therapies, hyperbaric oxygen therapy, stem cell therapies, bio-energy therapies, nutritional therapies, body work, and other are planned for four continents.

You can learn more about the following Divisions of GGT BioMedical on our website through these links:

- [Energy Healing](#)
- [Healing Centers](#)
- [Stem Cell Research](#)

*"We believe in the right use of technology – and are developing superior construction and manufacturing techniques."*

## GENIUS TRUST

### COMMERCE

GG Commerce includes activities in manufacturing, construction, and software engineering fields. Projects span the spectrum from 3000 year old techniques for the manufacture of artificial stone as used to build the pyramids to cutting-edge technologies for flying cars and a automated point-to-point pilotless air transportation system.

Our commercial activities include:

- Management services for affiliated and contracted enterprises
- Skycar Manufacture
- Alternative energy systems manufacture
- Geopolymer development and manufacture
- Building construction in Ecuador
- Steel-framed disaster-proof building manufacture
- Monolithic dome construction
- Metal refining
- Minting of gold and silver coins
- Airlift Cable Transport
- ATLAS Point to Point automated air traffic control system
- Collective Intelligence Decision Making Software System

More details on the following are available on our website:

- [Construction](#)
  - Airlift Cable Transport
  - Domes
  - Geopolymers
  - Paving Block
  - Secure Housing
- [Company Management Services](#)
- [Manufacturing](#)
  - Coin Minting
  - Matrix Manufacturing

  - Air Traffic Control
  - Decision Making System
  - Farm to Market
  - Personal Concierge

*"We are committed to new cutting-edge healing modalities, in a holistic perspective of balance."*

## GENIUS TRUST

### ENERGY

GG Energy is committed to bring new energy technologies to market. Its technologies can be separated into different categories:

- Energy-saving modifications of current technologies, such as an internal-combustion engine which produces only 5% of the pollution as current-production engines.
- Bridge technologies, such as mini-hydroelectric or wind power technologies with greater efficiencies than those currently available.
- Co-generation technologies, like plasma gasification of agricultural or solid waste, and associated electrical generation.
- Totally new technologies which promise energy production from new and novel sources.

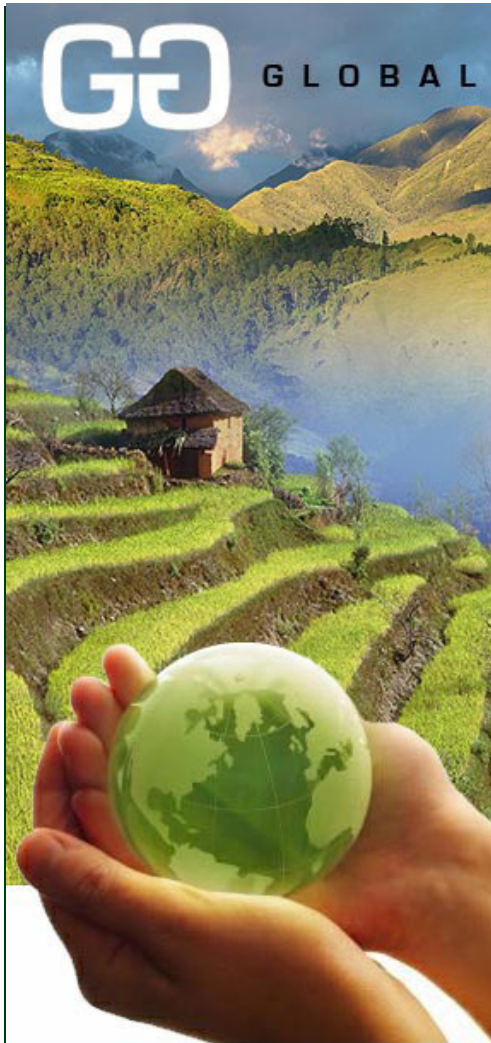

GG Energy seeks to give inventors and developers a safe, viable path to production of their technologies, and to give the world access to innovations and suppressed technologies.

We are working in conjunction with United Nations-associated NGOs such as the Inter-governmental Renewable Energy Organization (IREO) and the Humanitad Foundation.

GG Energy is currently developing the following projects. To learn more, visit our website at these links:

- [Ancient Technology](#)
- [Gasification](#)
- [Magnetic Motors](#)
- [Mini-Hydro](#)
- [Papp Engine](#)
- [RotoVerter](#)
- [Wind Power](#)

*"We are dedicated to support only those industries which are sustainable and do no harm to the environment."*

## GENIUS TRUST

### ENVIRONMENT

Environmental awareness is on every corporate public relations agenda today. Yet, how many corporations truly seek to protect and restore the environment?

GGT seeks to benefit the Earth in several ways:

- Development of alternative energy sources which will reduce or eliminate our current dependence on fossil fuels as energy sources.
- Remediate deforestation and heavy metal contamination of the Ecuadorian landscape, river systems, and human inhabitants.
- Replacement of toxic mining and industrial processes with non-harmful ones.
- Developing ecologically acceptable alternatives or solid waste and waste water processing.
- Seeking out and utilizing the most environmentally friendly options for necessary industrial operations.
- Actively working for the Preservation of forests, waterways, and genetic heritage of food and other crops.
- Teaching third-world societies new ways (old ways!) of relating to the earth.

- Developing sustainable methods for living in communities in third world countries.

GGT Environs has details on the following projects on our website:

- [Gasification](#)
- [GG City](#)
- [Nuclear Waste Neutralization](#)
- [Reforestation](#)
- [Seed Bank](#)
- [Solid Waste Handling](#)
- [Waste Water Treatment](#)

*"We intend to fully participate in a non-exploitive alternative economic system."*

## GENIUS TRUST

### FINANCE

It is no secret that the world financial market is in jeopardy. The dollar is expected to collapse under the weight of US debt worth 570% of GDP. The Euro reels from blows administered by unrestrained debt in Spain, Greece, Portugal, Hungary, Ireland, and Italy. The U.S. bond (debt) market is two-and-a-half-times the size of the U.S. stock market!

Businesses throughout the world are suffering from a lack of credit, a lack of money, yet there is no true lack of money! There is plenty of money, or at least plenty of the debt instruments that pass for money in all nations, but it is not circulating. Just as in the engineered crash of the economy in 1929, which was brought on by an intentional 30% contraction in the amount of money in circulation, the current financial powers that be are trying to increase their control of the world's wealth by contracting the economy, bringing on a deliberate crash, while planning to buy the dregs of the economy at bargain basement prices afterwards.

GGTrust intends to participate in an *alternative economic system* that is being created, one that may lessen the shock of the coming collapse. By using local alternative currencies, communities in the Great Depression of the 1930s were able to prosper, even without access to supplies of their national currency. But when their central governments forbid the use of these local alternative currencies, these communities experienced the same collapse as their unfortunate neighbors.

Rather than using solely government-mandated debt instruments (called "fiat currency", legal tender, or National Currencies), GG Financial has discovered such monetary mechanisms as self-liquidating bills of credit, "terra-cotta bills of exchange", self-liquidating loans, and esoteric instruments used by private commerce such as Uniform Advertising Week Promissory Notes, which can quickly and easily re-capitalize banks, increase the amount of money in circulation, and reduce the debt of the community, and of the nations.

By using these complementary currencies and protocols, alongside the debt instruments that all current governments mandate as their national currency, GGT Financial has the means to quickly and greatly increase its own assets, thus benefiting its shareholders, while also funding a large number of projects important to the ecology, the economy, society, and humanity.

*"Through GG Media, we intend to shift the planetary focus from negative to positive."*

## GENIUS TRUST

### MEDIA

GG Media is an interface between GGT, its various subordinate businesses, and international media outlets.

GG Media primary functions include:

- Production of media products for Internet, print and broadcast media outlets, in South America and Internationally
- IT and communications support for GGT operations
- Purchase of pre-paid advertising for contract advertising
- Production of cutting edge videos, films, and other media presentations for international distribution
- Acquisition of under-utilized media outlets into a more successful package
- Paradigm-shifting coordinated campaigns in international markets
- Production of media products for Internet, print and broadcast media outlets.

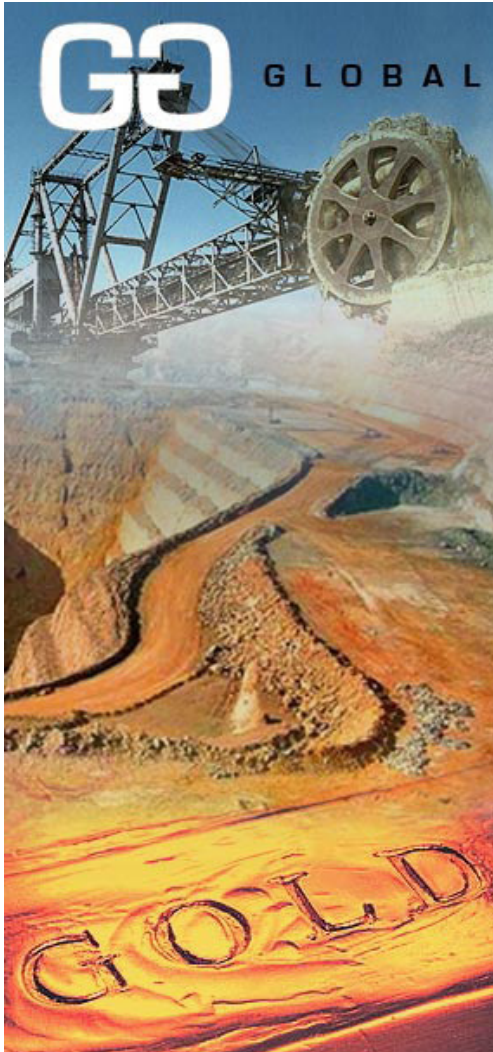

GG Media has production capabilities in print and audio media available for use by GGT firms, as well as for outside contracts. Video and television production capabilities will be added soon. Presentation of new ideas and possibilities will give people a higher approach to life, and will shift life in these countries from negative focus to positive.

GENIUS TRUST

## MINING

GG Mining is committed to minimizing its impact on the earth, and leaving the mining sites clean, beautiful, and productive. (read more in Environmentally Friendly)

Our mining properties - South Ecuador and North Peru are well known as possibly the two largest gold mining deposits in the world. It is quite common to find several times more gold here than in most other mines throughout the world.

Our intention – is to own, operate and acquire the largest gold mining operation in South America; and we utilize this gold to back up a new worldwide commodities based currency.

We are working on projects ranging from a \$100K to \$1B investment. All of these projects have an above average return on investment potential.

*“Our intention is to own and operate the largest gold mining operation in South America.”*

Area Covered: ECUADOR, PERU, MEXICO

We invite you to click on the links below for more detailed information on our mining projects:

  - Eco-friendly Refining

*"We are seeking out the development and implementation of new, clean and innovative transportation opportunities."*

## GENIUS TRUST

### TRANSPORTATION

GGTransportation seeks out new and innovative transportation opportunities. It then vets these solutions, and applies them to recognized transportation needs. Finally, it applies GGT funding to bring these solutions into reality.

Some of the projects that we are working on include:

- Vertical take off and landing Skycar production and deployment.
- Development of a point to point, pilotless air traffic control system, utilizing Skycars and other aircraft.
- Development of motors and propulsion systems that do not require fossil fuels to operate.
- Creation of networks of helicopter transportation in South America to support medical evacuation, charter operations, and industrial needs.
- Use of heavy-lift, lighter than air vehicles to support selective, sustainable logging of post-mature trees without damaging logging roads, as well as possible use as one leg of a sustainable trans-Amazon transport system.
- Creation of a heavy railroad along existing road rights of way, to serve heavy industry in Ecuador.
- Creation of a sustainable, zero-carbon impact trans-Amazon barge transportation system, powered by water-flow-generated hydrogen or zero-point energy. These craft would be automated, pollution-free, and have zero environmental impact in the Amazon basin.

- Use of cable air-lift system in the Andes to avoid extensive road-building operations.
